

Creating a Transparent Image Using LiveQuartz

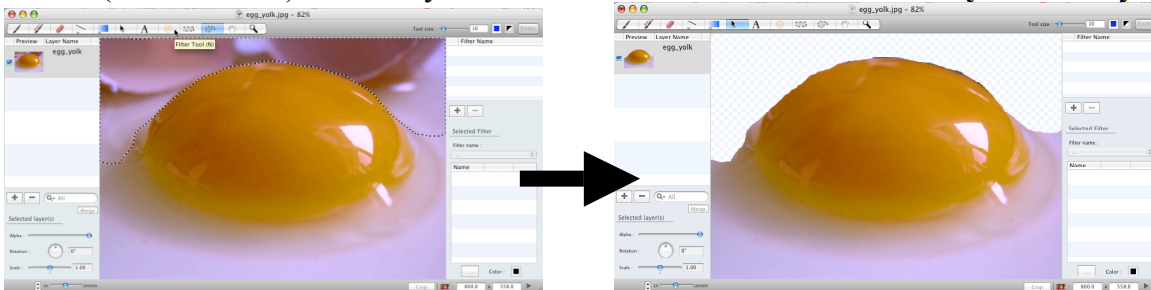

You will need to be able to remove the background from images in order to layer them over background images.

1. Right-click on the image file (usually a JPG). Open with LiveQuartz.

2. Choose the Lasso Tool  in LiveQuartz.
3. **Select** (draw around) the area you wish to delete. Press the **delete** key on the keyboard.

4. **IMPORTANT!!! Save as a JPEG-2000 file** in order for the image to be transparent!
The file extension for a JPEG-2000 is .jp2
