

Mystery Story Book Covers

You will create a cover for the mystery stories that you are writing in Mr. Fishbein's class. You will use a collage photography technique in order to create your book cover. Collage photography is a layering of multiple photographs into one photo. The final collage photo must represent ("fit") your story. The cover must also include the title, author, a caption, and photo credits.

How do I layer photos?

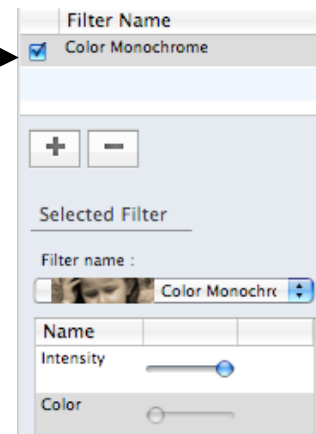

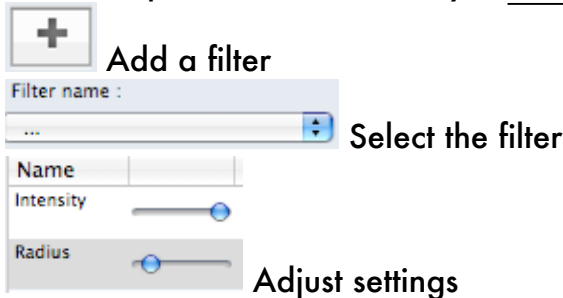

1. **Open LiveQuartz.** (LiveQuartz is an easy-to-use photo editing application.)
2. **Drag a photo** into the canvas or the layers menu to create a new layer containing the photo.
3. **Change order of layers** by dragging layers within layers menu. Layers go top to bottom in both the menu and the canvas.
4. **Select (click) layer** in layer menu to work with that layer.
5.  Use **arrow** (Drag tool) to grab and move layer.
6.  Uncheck layer to hide layer.
7.  **Eraser tool** erases the background to make background transparent.
8.  **Text tool** creates a textbox
9.  **Fonts** button opens fonts menu

10.  **Tool size** adjusts the size of all tools.
11.  **Alpha** makes entire layer transparent.
12.  **Scale** adjusts the size of the layer.

13. **Filters** adjust the look of the layer.

14. **Save** as a RHIF file while working in LiveQuartz.
15. **Save** a copy as a JPG file when finished.
